

SESIKILE BCI PROPERTY FUND

Minimum Disclosure Document (Fund Fact Sheet)

SESIKILE CAPITAL
Listed Property Investments

FUND OBJECTIVE

The Sesfikile Boutique Collective Investments Property Fund Class A is a portfolio which aims to deliver both a high income yield as well as capital growth over the medium to long term. Our objective is to deliver total returns (consisting of income and capital) that outperform the FTSE/JSE All Property Index (J803) over a 3 to 5 year investment horizon. The fund is suitable for investors who are looking for a viable property component to a balanced portfolio; or alternatively an investor looking for a growing income stream, but is willing to be exposed to an element of capital volatility.

SESEFIKILE BCI PROPERTY FUND

Minimum Disclosure Document (Fund Fact Sheet)

FUND STRATEGY

This fund aims to outperform the benchmark by investing in listed property companies with sustainable income growth underpinned by strong property fundamentals. In addition to these core holdings, the fund makes use of tactical stock selection to capitalise on short-term market mispricing and corporate action opportunities.

INVESTMENT POLICY

The policy is to invest in JSE listed Real Estate Investment Trusts ("REITs") or listed property companies. The investment manager will also be allowed to invest in financial instruments (derivatives) and cash as allowed by the act from time to time in order to achieve its investment objective. Furthermore, and as legislation permits, the manager shall be permitted to invest in offshore listed property investments on behalf of the **Sesfikile BCI Property Fund**.

WHY CHOOSE THIS FUND?

The fund offers active best of breed management within a sector that offers income and capital growth over time:

- All shares are subject to rigorous, in-depth research;
- While ultimate portfolio construction adheres to Sesfikile's unique **"Four D"** approach:
 - Our passion for direct property
 - Getting stuck in the detail
 - Understanding the broader drivers of property investment
 - Taking views on corporate action deals and finding the hidden potential in the sector.
- Through extensive experience in the listed property sector, we believe our team has the ability to identify the key differentiators to performance and ultimately the factors that impact total returns for clients. Importantly, given our commitment to capping the total size of assets under management we will remain nimble enough to execute on investment ideas effectively over the medium to long term.
- Since inception, our investment process has been able to deliver consistent low-risk outperformance of the benchmark on an after fee basis. Although this is no guarantee of future performance, we are confident in our robust investment and risk management process and alignment of interest with clients will consistently steer us towards identifying value added investment opportunities.

MARKET REVIEW

The All Property Index (ALPI) and SA Listed Property Index (SAPY) recorded a respective total return of -6.2% and -4.0% for the quarter ended 31 December 2018. This took the total return for the 12 months ended 31 December 2018 to -25.0% for the ALPI and -25.3% for the SAPY, the poorest calendar year performance for listed property on record. Bonds were the best performing asset class in 2018 with a total return of 7.7%, followed by Cash (7.3%) and Equities (-8.5%).

The sector's rating is currently being impaired by weakening growth prospects and a lack of confidence in corporate governance. However, we think that the recent carnage has been overdone. The ALPI is currently trading at a forward yield of 9.4%. We believe, barring any extreme outliers, this base can deliver circa 14% total returns in 2019.

Domestic bonds are expected to benefit from improved inflation expectations on the back of lower oil prices and a stronger ZAR. Our 2019 year-end long bond yield forecast is 9.0%. Much will depend on the national elections, the next budget statement and Moody's credit rating review. Global bond yields are trending higher with the 10y bond expected to increase by 22bps to 1.5% in the UK and 50bps to 2.65% (EUR denominated) in Central and Eastern Europe. While bond yields are a key driver of the sector's rating, the spread at which property trades at relative to bonds is equally important. This spread is a function of risk appetite and growth expectations. In our view, this spread will narrow, albeit marginally, as companies who have rebased earnings in 2018 begin to show improved sustainable growth.

Fortunately, the ALPI provides for a more heterogeneous array of counters from which there will be winners and losers. We believe that with the choice we have we can maintain our consistent outperformance of the benchmark through active management and that total return prospects should start to improve, although not without volatility.

TER AND TRANSACTION COST (INCL. VAT)

Please note: A higher TER ratio does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's. Transaction Costs are a necessary cost in administering the Fund and impacts Fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, the investment decisions of the investment manager and the TER. The prior year ("PY") TER and Transaction cost calculations are based upon the portfolio's direct costs for the financial year ended 31 August 2018, whilst the underlying portfolios' ratio and cost calculations are based upon their most recent published figures, being 30 September 2018.
