

SESIKILE BCI PROPERTY FUND

Minimum Disclosure Document (Fund Fact Sheet)

FUND OBJECTIVE

The Sesfikile Boutique Collective Investments Property Class A Fund is a portfolio which aims to deliver both a high income yield as well as capital growth over the medium to long term. Our objective is to deliver total returns (consisting of income and capital) that outperform the FTSE/JSE Listed Property index ("SAPY Index") over a 3 to 5 year investment horizon. The fund is suitable for investors who are looking for a viable property component to a balanced portfolio; or alternatively an investor looking for a growing income stream, but is willing to be exposed to an element of capital volatility.

FUND STRATEGY

This fund aims to outperform the benchmark by investing in listed property companies with sustainable income growth underpinned by strong property fundamentals. In addition to these core holdings, the fund makes use of tactical stock selection to capitalise on short-term market mispricing and corporate action opportunities.

INVESTMENT POLICY

The policy is to invest in JSE listed Real Estate Investment Trusts ("REITs") or listed property companies. The investment manager will also be allowed to invest in financial instruments (derivatives) and cash as allowed by the act from time to time in order to achieve its investment objective. Furthermore, and as legislation permits, the manager shall be permitted to invest in offshore listed property investments on behalf of the Sesfikile BCI Property Fund.

WHY CHOOSE THIS FUND

The fund offers active best of breed management within a sector that offers income and capital growth over time:

- All shares are subject to rigorous, in-depth research; while ultimate portfolio construction adheres to Sesfikile's unique "Four D" approach:
 - Our passion for direct property,
 - Getting stuck in the detail,
 - Understanding the broader drivers of property investment,
 - Taking views on corporate action deals and finding the hidden potential in the sector.
- Through extensive experience in the listed property sector, we believe our team has the ability to identify the key differentiators to performance and ultimately the factors that impact total returns for clients. Importantly, given our commitment to capping the total size of assets under management we will remain nimble enough to execute on investment ideas effectively over the medium to long term.
- Since inception, our investment process has been able to deliver consistent low-risk outperformance of the benchmark on an after fee basis. Although this is no guarantee of future performance, we are confident in our robust investment and risk management process and alignment of interest with clients will consistently steer us towards identifying value added investment opportunities.

FUND MANAGER INFORMATION

The three founding directors, Evan Jankelowitz, Mohamed Kalla and Kundayi Munzara co-manage the Sesfikile BCI Property Fund. Evan previously co-managed the award winning Stanlib Property Income Fund which he left as the best performing fund in the sector. Mohamed was a top rated sell-side analyst at BJM Securities while Kundayi was previously Head of Research at Investec Property. The three managers have a combined investment experience of over 35 years in the SA listed property sector making them one of the most experienced teams in the market.

MARKET REVIEW

After a dismal first quarter, the SA Listed Property Index ("SAPY") posted another disappointing return of -2.2% in 2Q18. Despite a healthy bounce in April, as the 'Resilient stable' bounced off their lows, both May and June saw an array of disappointing economic indicators. And to make things worse, the quarter culminated in a material emerging market sell-off as the US and China faced-off in a possible trade war. The risk-off sentiment sent both the rand and local bonds meaningfully lower.

Property failed to claw back any losses from Q1 and took a further leg down in Q2 (-2.2%) through a combination of weaker bonds and subdued growth expectations. Bonds suffered a similar malaise, down 3.8%, as yields pushed higher, while equities stood out in the green, up +4.5%, as the weaker rand buoyed several of the larger rand-hedge counters. It should also be noted that the All Property Index ("ALPI") outperformed the SAPY in Q2 with a total return of -0.5%. This was largely driven by the higher direct offshore exposure in the index. Sesfikile has officially changed over to the ALPI effective 1 July 2018, and while we appreciate the 'beat', our intention to convert was premised not on short-term outperformance, but rather longer-term diversification and choice that will allow us to align more effectively to our best investment view.

The year-to-date pull-back has been significant and the worst in recent history. The weakness is not unfounded as operational performance is weak, income statements are fraught with once-off line items and while balance sheets are not particularly stretched, they are coming off a low cost of funding. This has and will continue to put pressure on distribution growth. In addition, with political and economic instability coupled with a global push in interest rates, we can justify a pull-back; however, we think that the recent carnage has been overdone.

SA-focused stocks are trading at an average forward yield of 10%, while the current relative yield to bonds was last seen at the height of the global financial crisis. Admittedly, a lot of this discount is due to the fallout of the 'Resilient stable', as well as the unwind of non-recurring earnings from several companies. But the earnings forecasted in the forward yield projections are undemanding and have already been written down in many cases. On this basis, we are currently seeing good value in the sector, however the caveat is that there are some very specific risks within certain companies, so careful stock selection is of primary importance.

TER AND TRANSACTION COST (INCL. VAT)

Please note: A higher TER ratio does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's. Transaction Costs are a necessary cost in administering the Fund and impacts Fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, the investment decisions of the investment manager and the TER. The prior year ("PY") TER and Transaction cost calculations are based upon the portfolio's direct costs for the financial year ended 30 September 2017, whilst the underlying portfolios' ratio and cost calculations are based upon their most recent published figures, being 31 March 2018.
