FUND STRATEGY

The Fund’s objective is to deliver USD total returns that outperform the FTSE EPRA/NAREIT Developed Rental Net Index (“Index”) over a 3 to 5-year investment horizon. Our macro-economic views inform our regional allocations while our sector themes inform our stock picking to deliver outperformance without exposing clients to unnecessary risk.

INVESTMENT POLICY

The policy is to invest in globally listed Real Estate Investment Trusts (“REITs”) or listed property companies. The investment manager will also be allowed to invest in financial instruments and cash as allowed by the act from time to time in order to achieve its investment objective. Furthermore, and as legislation permits, the manager shall be permitted to invest in offshore listed property investments on behalf of the Sesfikile BCI Global Property Fund. The portfolio may from time to time invest in listed and unlisted financial instruments. The portfolio’s global property exposure will always exceed 80% of the portfolio’s asset value. Up to 10% of the portfolio may be invested in shares outside the property sector in companies that conduct similar business activities.

WHY CHOOSE THIS FUND

The Fund offers investors:

- The ability to access the most sought-after real estate via investment in blue chip listed property companies or REITs in developed markets including:
 - Northern America (USA and Canada)
 - Europe
 - United Kingdom
 - Japan
 - Hong Kong
 - Singapore
 - Australia
- Geographical and sector diversification with low asset concentration risk.
- Cost effective offshore solution managed by an experienced team.
- Liquidity as investors can access US Dollar Returns by investing Rands while enjoying the usual benefits of a Collective Investment Scheme which include daily pricing and 48-hour liquidity.

MARKET REVIEW

Global REITs (as measured by the EPRA/NAREIT Developed Rental Index Net TR, USD; “Benchmark”) ended the month up 2.7% in USD (+4.8% in ZAR), underperforming global equities, which delivered a total return of +5.9%, but outperforming global bonds, which posted a total return of +0.3%. By region, US and Australian REITs generated the best performance, returning +4.4% and +1.8%, respectively. In turn, Singapore and Hong Kong REITs lagged, with returns of -4.4% and -3.1%, respectively.

Donald Trump’s and the Republican Party’s victory in the US elections has increased the likelihood of tax cuts, expansionary fiscal measures, and a shift toward a more nationalist trade policy, all of which could be inflationary. Nevertheless, investors continue to expect most central banks to maintain their monetary easing strategies. Both the US Federal Reserve (Fed) and the Bank of England (BoE) reduced their base rates in November while signalling a cautious approach going forward.

The single-family rental sector performed the best for the month, gaining 8.9%. This was likely driven by a rise in U.S. mortgage rates to c.7%, making homeownership less affordable and driving increased demand for single-family rentals. Data centres followed closely, as the second-best performing sector, up 8.8%, supported by strong Q3 results that highlighted robust demand. On the other hand, the manufactured homes and student accommodation sectors lagged, declining 1.9% and 1.5%, respectively. The weakness in manufactured homes was primarily attributed to Sun Communities, which dropped 4.8% after delivering disappointing Q3 results. The company missed consensus expectations, revised its guidance downward, and announced a management restructuring, all of which weighed on performance.

After months of speculation, Blackstone (BX) announced that they would acquire Retail Opportunity Investment Corp (ROIC) for \$17,50 per share in an all-cash transaction valued at \$4 billion. The price represents a 34% premium to the unaffected share price. ROIC owns a high-quality portfolio of 93 grocery-anchored shopping centers concentrated in Los Angeles, Seattle, San Francisco, and Portland. A takeout by one of the best real estate investors out there is a strong vote of confidence in the strength of the sector fundamentals.

The Macerich Company (MAC), which owns malls in the US, raised \$395 million in a secondary share offering and intends to use the proceeds to repay a mortgage loan with an effective interest rate of ~9%. The shares rallied 14.4% on the back of the announcement.

Brookfield Asset Management and Segro (SGRO) confirmed signing a binding exclusivity agreement for SGRO to buy six of their recently acquired Tritax Eurobox plc (EBOX) logistic assets for EUR 470 million in cash.

The proposals made by two political parties in Spain (PSOE and SUMAR) to amend or eliminate the REIT regime were rejected during a sitting of the Spanish congress during the month.

A data center joint venture has sold two assets in Singapore to Keppel DC REIT for SGD 1.38bn in one of the largest data center transactions in Southeast Asia. Keppel launched a private placement as well as a fully underwritten rights issue to fund the acquisition.

Global REITs are trading at a 4.7% discount to net asset value (NAV) and offer a 4.0% dividend yield. Over the medium term, dividends are likely to grow faster than earnings, as payout ratios are expected to mean-revert toward the low 80% range, from 73% currently. Due to better-than-expected tenant demand and muted supply growth in most sectors, we have upgraded our 2024 funds-from-operations (FFO) growth forecast from 4% to 5%, with growth of 6% per annum over the next two years. Considering all these factors, we expect total returns of 11-12% in USD over the next 12 months.

TER AND TRANSACTION COST (INCL. VAT)

Please note: A higher TER ratio does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's. Transaction Costs are a necessary cost in administering the Fund and impacts Fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, the investment decisions of the investment manager and the TER. The prior year ("PY") TER and Transaction cost calculations are based upon the portfolio's direct costs for the financial year ended 31 December 2023, whilst the underlying portfolios' ratio and cost calculations are based upon their most recent published figures, being 30 June 2024.
